On the following web pages, I have provided students with semi-notes in PDF file format for downloading.

In order to read the PDF files you need Acrobat Reader version 5.0 installed on your computer. Students wishing to access the files from home need to download Acrobat Reader and install it. The download is FREE and available at:

http://www.adobe.co.uk/products/acrobat/readstep.html

When you download Acrobat, you will be asked to save a file to your hard drive. Remember where you save this file! Once the file has been downloaded, find where you save the file. You will have to double click on the .EXE file that you downloaded. Follow the instructions provided and you will have an Acrobat Reader.
