

Applying to the Rader Lab

Interested in pre-mRNA splicing? Looking for some experience working in a biochemistry lab? Here is what you need to do to apply for a position in the Rader lab:

Send the following things to rader@unbc.ca with "lab applicant" in the subject line:

Everyone (including Summer Research Fellows)

1. A cover letter describing who you are, what your long-term interests are (research, medicine, fishing...), what lab experience you have, and why you are interested in the Rader lab in particular
1. Your transcript (an unofficial version is fine)
1. Contact information for three references who know you personally in a research or academic context

Independent Study (Chem 499) students

4. Your proposed course schedule
5. Any other significant time commitments you may have

Graduate Students

4. Your CV
5. Reprints of any publications you may have and a description of your contribution to them
6. A one-page description of a question that interests you in pre-mRNA splicing and how you might go about addressing it
7. A list of funding agencies that you can apply to for graduate fellowships or bursaries

Postdoctoral Fellows

4. Your CV
5. Reprints of your publications and a description of your contribution to them
6. A five-page research proposal on a question in pre-mRNA splicing
7. A list of postdoctoral fellowships to which you can apply
