

Algorithm Analysis and Development

Prerequisites: A grade of C⁻ or better in CPSC 100, CPSC 101, and CPSC 141; or permission of instructor.

Transitional Semester: The world, and the UNBC Prince George Campus in particular, continue to be disrupted by the Covid 19 pandemic. Consequently this syllabus is the *current* plan. It may be revised as circumstances change.

Instructor: David Casperson; **Office:** TL 10-2080; **Phone:** 960-6672; **e-mail:** David.Casperson@unbc.ca ; **web:** <https://web.unbc.ca/~casper/> and <https://learn.unbc.ca/> .

Admin Assistant: Felicity Edzerza; **Phone:** 960-4690; **e-mail:** csugrad@unbc.ca ;

Lecture times: MWF 16:30– 17:20. **Room:** 5-176. There are *no* assigned lab or tutorial times. Lectures may be recorded and later posted to learn.unbc.ca .

Text Book: [3] is *required* for this course.

References: [2] is a good JAVA resource book. [1] is difficult reading, but contains a wealth of information on list data-structures, algorithmic analysis and sorting algorithms.

Grading Scheme:

Homework:	25%	
Midterm 1:	20%	Fri, Oct 15
Midterm 2:	20%	Mon, Nov 15
Final Exam:	35%	3h in 7–1y Dec

I reserve the right to re-weight the components of the marking scheme. Your grade will always be at least as good as you would have had with the original weighting.

Assignments: There are occasional written non-programming assignments (typically, math-like problems) throughout the semester.

There are medium-sized programming assignments during the semester. Familiarity with JAVA is assumed.

Syllabus: Material is mainly from Chapters 2–4 and 7 of [3], with other material as time permits. Topics include:

- Course introduction, loop invariants. (1 week)
- Algorithm analysis and asymptotic complexity (2 weeks).
- Java generics, strict week order. (1 week)
- Sorting algorithms, recursive algorithms (2 weeks).
- Containers, linked lists, stacks, queues, dequeues and iterators (2 weeks).
- Tree classes (1 week).
- Introduction to decidability, complexity, and complexity classes (1 week).

Times are approximate. More detail may be found on the learn.unbc.ca site.

Academic Offenses: First offenses result in a grade of –100% and formal notification of the Faculty Dean. Allowing someone to copy your work is an offense. See the UNBC Calendar for official rules and details.
