

## **Wilderness Tourism Licensing Kit**

Anyone who rents equipment to commercial or private wilderness travelers must complete and submit a rental report. Vehicles and equipment include canoes, bicycles, all-terrain vehicles, snow machines and any other equipment used to carry people through the wilderness. You are not required to report on items such as tents, sleeping bags or backpacks. For more detail check the rental report form included in this kit.

Like trip reports, summer rental reports are due by October 31 and rental reports for winter activities are due by May 31.

Statistical information obtained from rental reports is used to help keep track of local economic benefits as well as the environmental impacts accumulating from the wilderness tourism sector.
